Personal Project

TODO App(03/2023-03/2023)
- Designed and developed a todo app using Node.js, MongoDB, and React.js. Implemented CRUD operations to manage user tasks and incorporated authentication using JSON Web Tokens (JWT) for secure user access. Designed a responsive and user-friendly front-end interface using React.js.

Movie Searching Webpage (03/2023 - 03/2023)
- My movie searching webpage project challenged me to integrate an API into my front-end design and use JavaScript to display and organize the data in a user-friendly way. I had to troubleshoot issues with API data retrieval and implement responsive design to ensure the webpage looked great on any device. Through this project, I demonstrated my skills in web development, problem-solving, and project management.

PortFolio Webpage (11/2022 - 11/2022)
- My portfolio webpage showcases my ability to use HTML5 and CSS3 to create a visually appealing and user-friendly interface. I also used JavaScript to add interactive elements and dynamic features, such as a contact form and image slider. Through this project, I demonstrated my proficiency in front-end web development and my ability to design and develop a professional website from scratch.
